Downer EDI Works Limited selects Benchmark for their New Zealand operations

Downer EDI Works Limited has chosen to implement Benchmark Estimating Software throughout their New Zealand operations.

“We have selected Benchmark because, no matter what line of work each individual business unit is in, the software can produce estimates quickly and accurately. Benchmark will be utilised in a way that can be rolled out throughout the entire organization,” Downer EDI Works Chief Operating Officer, Peter Reidy said.

“Downer EDI Works is growing strongly and we were impressed with how quickly we can implement Benchmark Estimating Software into new business units,” Peter says.

Commenting on the announcement, Benchmark Estimating Software Director Rob MacDonald says, “We are thrilled that Downer EDI Works has chosen to implement Benchmark throughout their organisation, and look forward to assisting them grow.”

“No matter what line of work each individual business unit is in, the software can produce estimates quickly and accurately.”

Downer EDI Works is a leading New Zealand infrastructure provider delivering engineering solutions in the transport, utility and water/wastewater sectors. The company

employs more than 2,400 New Zealanders with sales in excess of NZ\$700 million. The company has significant representation in almost every New Zealand community. Downer EDI Works is part of the Downer EDI Group, one of Australasia’s largest listed engineering and infrastructure services companies.
